

NATURE'S COMFORT

Our new SunMor Solar System can increase our already 78% efficient wood or coal boiler to **OVER 100%**

NATURE'S COMFORT

Benefits:

- * You start saving on the first sunny day, works on partly cloudy days too!
- * Need more heat? Just add more units! One SM-H60 will heat up to 175 gallons.
- * Hook up in series or parallel (see pictures below)
- * Can operate without a pump (works by heat siphon when hooked up to an outdoor boiler) or use a small 110V or a 12V pump powered by a solar panel.
- * One SM-H60 can produce up to 72,000 BTU's per day!
(the average household uses 24,000 Btu's to heat their hot water per day)
- * Priced to pay for itself in just a few years!
- * Burn less wood, coal, LP, natural gas or electricity.

- 2 1/4" outside diameter (58mm)
- 1 3/4" inside diameter (43mm)
- Double wall structure with captive vacuum seal for zero heat loss
- Copper coatings create infrared heat absorption
- Super-absorbent inner tube coating uses solar energy to heat the water
- Insulated construction keep water hot over night

2 Units In Series

Multiple Heaters In Parallel
