

Osburn has designed the Hybrid 45-MF pellet stove with the same modern and distinctive look as the West Bay 38 gas stove. The Hybrid-45MF pellet stove, with patented COMBEX technology, gives you all the advantages of wood pellet heat: easy to use, 65-hour autonomy, thermostatic control, electronic lighting, energy economy, and extraordinary heat and cleanliness. The COMBEX system balances combustion air and uptake to provide clean, worry-free combustion which is less dependent on the leak-tightness of the device and the quality of the combustible.
